SLIDE 1 • VISION & HOOK

The Future of Finance in Thailand

D365 Finance & Operations + Microsoft Copilot AI for FTH

~0:45 min

✨ Thailand Ready • AI Powered • People in Control

Next-Gen Thai Localization with Copilot AI

Empowering our Finance & Accounting teams in Thailand to eliminate repetitive manual work, prevent tax errors before they happen, and close the books with confidence.

Work Smarter
Automate Thai PDF invoice reading & 3-way matching.

100% Compliant
Built for ภ.พ.30, ภ.ง.ด.3/53 & e-Tax standards.

Human in Control
AI prepares drafts; accountants always approve.

SLIDE 2 • THE CHALLENGE

The Month-End Pain Point in Thailand

Why manual PDF checking slows down our Finance team

~0:50 min

CURRENT BOTTLENECK

Manual Key-In & Late Tax Surprises

Every Thai vendor invoice requires 7+ manual checks before it can even enter D365 F&O.

1. Mixed Thai/Eng PDFs

AP staff manually read PDFs & scanned images in different Thai fonts and layouts.

~5–8 mins / invoice

2. 13-Digit Tax ID & Branch

Checking 13-digit Tax Registration and 5-digit Branch (00000) by eye causes typos.

High Human Error Risk

3. VAT 7% & WHT Rules

Matching service types to WHT 1%, 2%, 3%, 5% and checking VAT rounding across lines.

Complex Thai Tax Rules

4. Found Too Late at Filing

Errors surface during ภ.พ.30 or ภ.ง.ด.3/53 preparation—causing rework & stress.

Month-End Crunch

Our Goal: Catch 100% of tax & master data errors BEFORE posting—automatically!

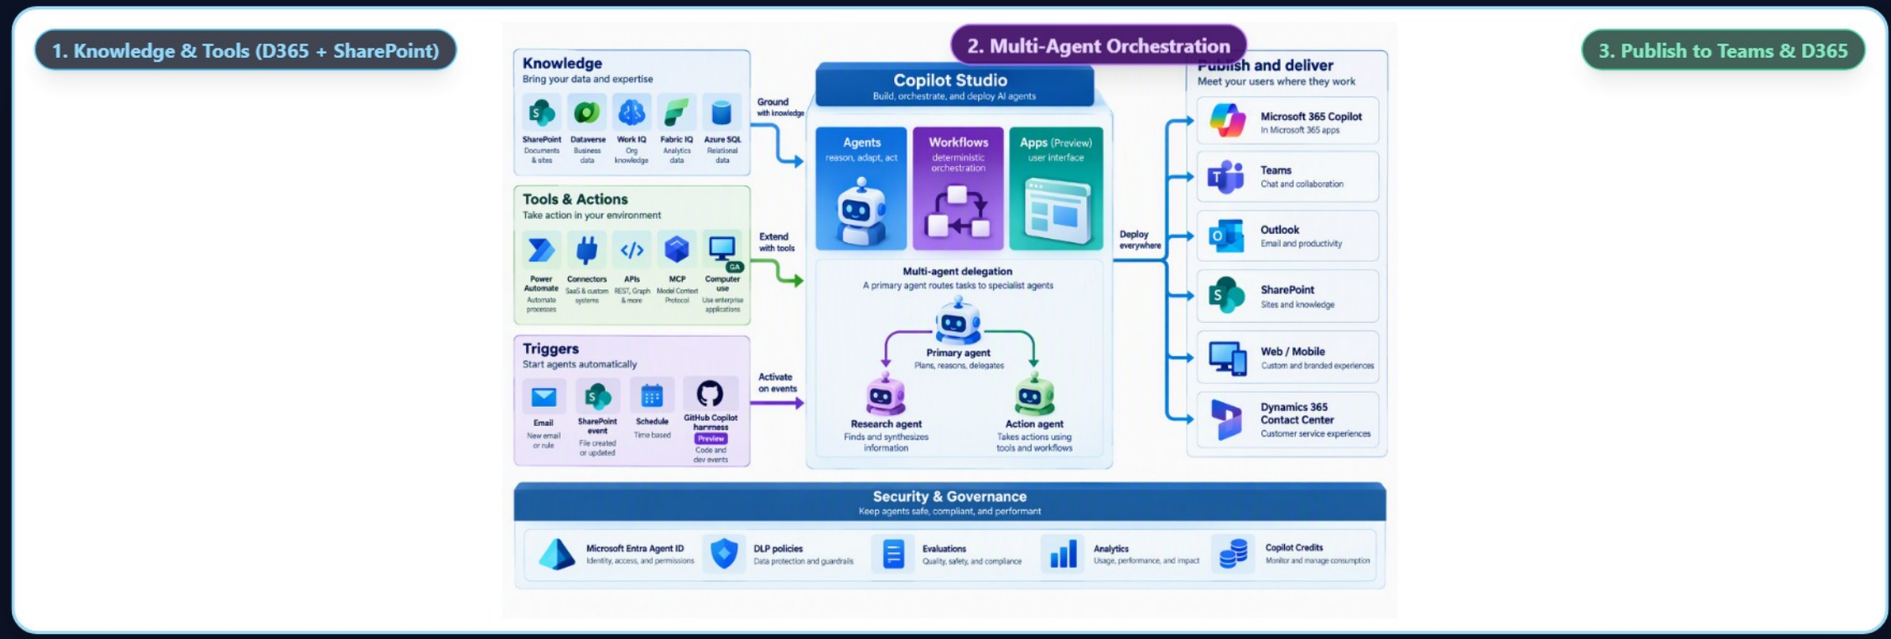

Shift-Left Compliance

SLIDE 3 • MICROSOFT OFFICIAL ARCHITECTURE

Meet Our Microsoft AI Powerhouse

Grounding D365 F&O data with Multi-Agent orchestration & enterprise security

~0:55 min

1. GROUND WITH KNOWLEDGE

Thai Revenue Dept manuals on SharePoint + live D365 F&O tables via Dataverse Virtual Entities.

2. EXTEND WITH TOOLS & APIS

Power Automate, D365 OData REST APIs, and Azure AI Document Intelligence v4.0.

3. MULTI-AGENT DELEGATION

Primary Agent delegates to Research Agent (Tax Rules) & Action Agent (D365 Drafts).

4. SECURITY & GOVERNANCE

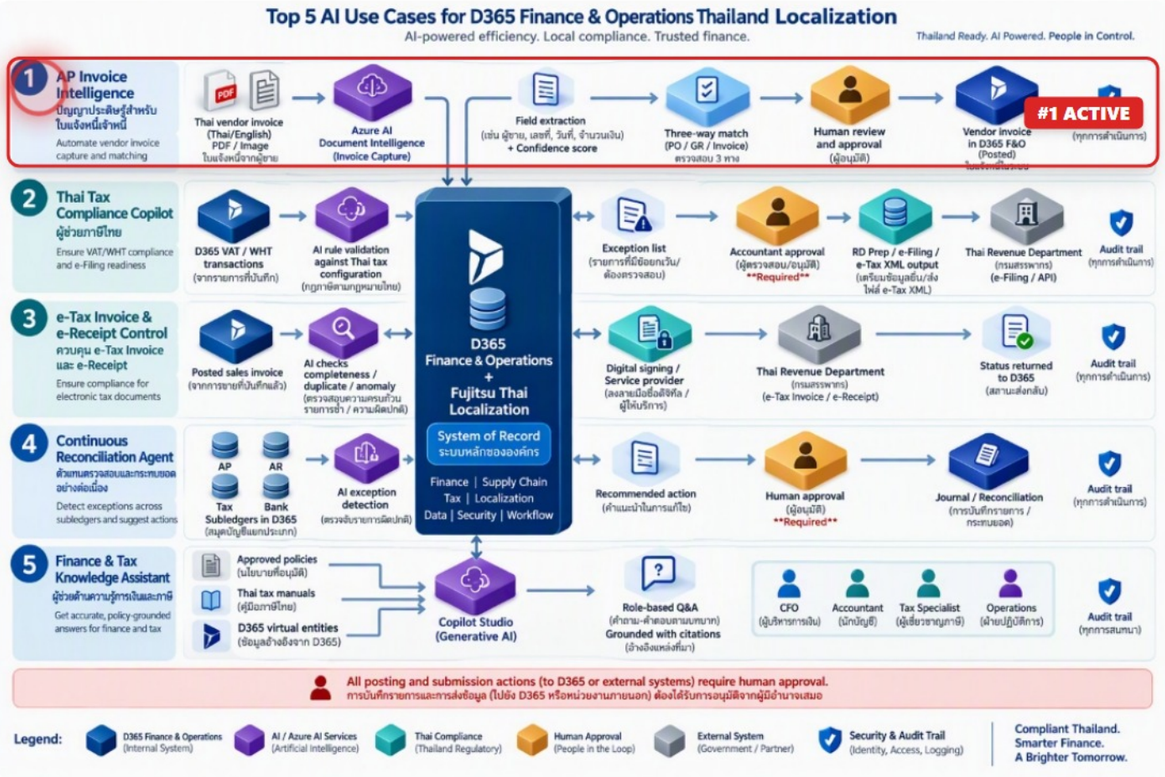

Protected by Microsoft Entra ID, DLP policies, and full Audit Trails.

SLIDE 4 • DEEP DIVE: TOP 5 AI USE CASES FOR THAILAND LOCALIZATION

Top 5 AI Use Cases for D365 Thailand Localization

Click any Use Case (1–5) or play audio to see Problem, AI Role, Flow & Business Benefit

~1:50 min

#1 AP	#2 Thai	#3 e-Tax	#4 Continuous	#5 Finance

USE CASE #1 OF 5 • ★ POC #1 FOCUS

Click #1–#5 to inspect each case

1. AP Invoice Intelligence (ใบแจ้งหนี้เจ้าหนี้)

⚠ **THE PROBLEM (ปัญหาที่พบ):**

AP manually reads Thai/English PDFs & images to check 13-digit Tax ID, Branch, PO, VAT & amounts—causing late errors at month-end.

🤖 **WHAT AI & DETERMINISTIC RULES DO (AI ทำหน้าที่อะไร):**

- Reads Thai/English headers & line items via Azure AI Document Intelligence v4.0 + Custom Model
- Checks Confidence Score & routes only low-confidence items to human review
- Validates against Vendor Master, PO, Product Receipt (GR), VAT 7% & WHT setup
- Creates Draft Pending Vendor Invoice before workflow

🔄 **END-TO-END FLOW:**

```
Invoice PDF/Image ➔ Azure Document AI v4.0 ➔ Validate Vendor/PO/VAT/WHT ➔ Human Review ➔ D365 Draft Invoice
```

🎯 **Business Benefit:** Cuts manual key-in by 70%+, speeds up AP recognition, and catches Tax/Master Data errors before posting.

SLIDE 5 • RECOMMENDED FIRST POC

Our First Big Win: AP Invoice Intelligence

End-to-end automated pipeline from Thai PDF to D365 Draft Invoice

~0:55 min

★ RECOMMENDED NEAR-TERM POC

How AP Invoice Intelligence Works in 5 Steps

STEP 1

TH

Thai/Eng Invoice

Vendor PDF or image arrives via Email or SharePoint.

STEP 2 • AZURE AI

Extract + Confidence

Reads Tax ID, Branch, PO, Net, VAT 7%, Total & Line Items.

STEP 3 • D365 MATCH

Validate & 3-Way Match

Checks Vendor Master, PO, Product Receipt (GR) & WHT/VAT.

STEP 4 • HUMAN IN LOOP

Smart Exception Review

Only low-confidence or mismatched items require manual touch.

STEP 5 • SAFE OUTPUT

D365 Draft Invoice

Creates Pending Vendor Invoice Draft—ready for standard workflow!

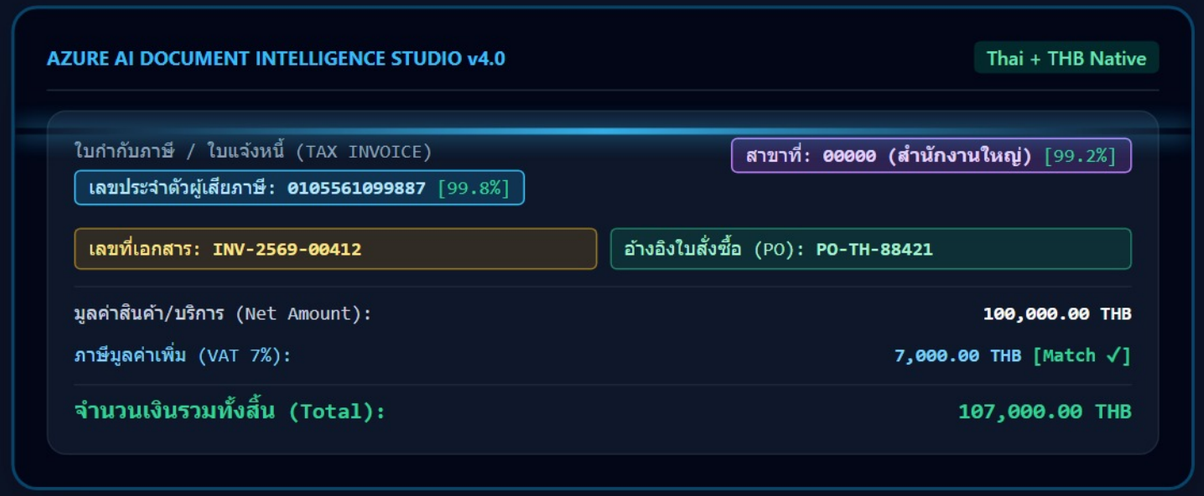

- ✓ Drastically cuts manual key-in time
- ✓ Catches Tax ID & Branch errors before posting
- ✓ Full Audit Trail on every single action

SLIDE 6 • THE SECRET SAUCE FOR THAI LANGUAGE

Azure AI Document Intelligence v4.0 + Custom Model

Native Thai & THB support + Custom training in just 5–10 sample documents

~0:55 min

🚀 Why Azure AI v4.0 instead of Standard AI Builder?

Standard AI Builder prebuilt invoice does not officially list Thai. Azure AI Document Intelligence v4.0 uses Multimodal LLM technology that natively supports Thai vowels, tone marks, Buddhist Era dates (พ.ศ.), and THB currency!

🎯 What is a Custom Model & How Easy Is It?

We simply upload 5–10 sample invoices in Azure Studio and highlight fields (or write a prompt!). The model learns our exact Thai vendor layouts in minutes.

✅ 100% D365 & Enterprise Compliant

Native Microsoft Azure service under the same Enterprise Agreement. Your data stays private in your tenant and is NEVER used to train public AI models.

SLIDE 7 • SAFETY & COMPLIANCE GUARDRAILS

Smart Guardrails: Deterministic Rules + Human in Control

AI never guesses tax laws—and never posts without human approval

~0:55 min

DETERMINISTIC ENGINE (100% EXACT)

No AI Guessing

Hardcoded Thai Tax & ERP Validation

- **13-Digit Tax ID Modulo-11 Checksum:** Verifies authentic Revenue Dept Tax ID math.
- **5-Digit Branch Code Rule:** Maps Head Office to 00000 automatically.
- **7% VAT & Penny Rounding Check:** Flags any variance beyond ±0.05 THB.
- **Duplicate Invoice Blocker:** Prevents double-billing in D365 VendTrans.

MANDATORY GUARDRAIL

AI RMS Compliant

Zero Auto-Posting Policy

All posting and submission actions to D365 F&O or the Thai Revenue Department strictly require an authorized human accountant to review and click Approve.

Accountant Sign-Off Required

Draft Pending Invoice → Human Approve → Post

100% Safe

SLIDE 8 • EXPANSION ROADMAP

Beyond POC: Scaling Across All 5 Use Cases

Ready for new 2026 Revenue Department rules (ภ.พ.30, ภ.ง.ด.3/53 & e-Tax)

~0:50 min

PHASE 1 (NOW) — Quick Win POC

1. AP Invoice Intelligence

Automate Thai/Eng invoice extraction, 3-way PO/GR matching, and Draft creation in D365 Sandbox.

✔ Immediate Time Savings

PHASE 2 (NEXT) — Tax & Knowledge

2. Thai Tax Copilot & Q&A Agent

Pre-validate ภ.พ.30 & ภ.ง.ด.3/53 (with Rule Versioning for March 2026 RD updates) + Role-based Q&A Assistant via Virtual Entities.

✔ Zero Compliance Penalties

PHASE 3 (SCALE) — Full Automation

3. e-Tax Control & Close Agent

Pre-check e-Tax XML before digital signing, translate Revenue Dept reject codes, and run continuous AP/AR/Tax/Bank reconciliation.

✔ Stress-Free Month-End Close

SLIDE 9 • POC EVALUATION SCORECARD

How We Measure Success: Clear KPIs

Tested against 50 diverse Thai, English & mixed vendor invoices

~0:50 min

OVERALL EXTRACTION
≥ 80%
95%+ on Tax ID & Amounts

STRAIGHT-THROUGH (STP)
≥ 60%
Zero manual typing needed

TIME SAVED / INVOICE
≥ 70%
From ~6 mins down to ≤ 1.5 min

SAFE GUARDRAIL
100%
Strict Draft-only output

FIELD-LEVEL TARGET ACCURACY BREAKDOWN (50-INVOICE TEST SET)

- Net Amount, VAT 7% & Total Amount — Target ≥ 98%
- 13-Digit Tax ID, Invoice No. & Date (พ.ศ./ค.ศ.) — Target ≥ 95%
- 5-Digit Branch Code (00000) & PO Reference — Target ≥ 90%
- Multi-Line Item Table Extraction — Target ≥ 85%

SLIDE 10 • INVESTMENT & LICENSING

Low Risk, High ROI: $0 Extra Cost for POC!

Leveraging Azure Free Tier & existing D365 F&O OData / Dataverse entitlements

~0:50 min

4-WEEK POC PHASE (50 INVOICES)

$0 / 0 THB Extra

- **Azure AI Document Intelligence (Free Tier F0):** 500 pages/month FREE.
- **D365 F&O OData REST API:** Included in existing D365 license ($0).
- **Dataverse Virtual Entities:** Included & uses zero extra database storage.

★ **Ready to start immediately with existing Sandbox!**

PRODUCTION SCALE (PAY-AS-YOU-GO)

~0.35 THB / Page

Standard Tier S0 is just ~$10 per 1,000 pages (~350 THB for 1,000 invoices/month).

- **OData & Virtual Entities:** Still $0 extra license cost.
- **Power Automate Orchestration:** Uses seeded license or 1 shared service account.

💡 **Saves hundreds of AP hours for less than the price of a cup of coffee!**

SLIDE 11 • 4-WEEK EXECUTION PLAN

Fast & Focused: 4-Week POC Roadmap

From AI RMS Registration to Live Sandbox Demo & Scorecard Review

~0:45 min

WEEK 1 • PREP & RMS

Governance & Dataset

- Complete internal **AI RMS Registration**
- Gather 50 Thai/Eng test invoices
- Define field mapping to D365

WEEK 2 • AI MODEL

Azure AI v4.0 Setup

- Provision Azure AI Free Tier
- Label 5–10 Thai vendor layouts
- Test confidence & extraction

WEEK 3 • D365 LINK

Rules & Sandbox Flow

- Build Tax ID Modulo-11 & VAT checks
- Connect OData to D365 Sandbox
- Generate Pending Invoice Drafts

WEEK 4 • SCORECARD

Executive Demo & Go-Live

- Measure 50-invoice accuracy & speed
- Verify Zero Auto-Post compliance
- Executive Go / No-Go review

SLIDE 12 • GRAND FINALE & EXECUTIVE APPROVAL

Uniting FTH, D365 F&O & Microsoft Copilot Studio

Approve the 4-Week POC — Shaping the Future of AI Finance in Thailand
